

Senior Data Analyst

Andafin helps emerging-market financial institutions use the power of data to grow and reach the next billion customers. We are looking for a Vietnam-based Senior Data Analyst to help us provide insights to banks worldwide, using our cloud data analytics platform.

Responsibilities:

- Manipulate and analyze financial services data using R statistical programming language
- Support the team in developing additional features for Andafin's analytics platform, including enhanced reporting and visualizations
- Work independently and collaborate with peers – we encourage you to take initiative
- May interface with Andafin clients, under direction of project team leader

Requirements:

- Data analysis experience using R programming and relational databases
- Experience with cloud computing platforms a plus
- Bachelor's degree or higher
- Fluent in English
- Financial services domain knowledge preferred (*but not required*)
- 3-7 years work experience

Location: Ho Chi Minh City, Vietnam (*home-based, plus regular team meetings during business hours*); domestic and international travel may be required

Contract: Flexible retainer (*Variable 10-20+ days per month; flexible hours*)
